

ProRealTime TRADING

Trading Commissions

final execution by Saxo

**Prices applicable as of March 1, 2025
All prices in this document are VAT included**

ProRealTime lets you trade from great charts with great prices and a leading online trading platform.

[Learn more about our services](#)
[Learn more about the ProRealTime platform](#)

ProRealTime offers reception and transmission of orders services on leveraged financial instruments. Order execution services are provided by Saxo.

Trading may expose you to risk of loss greater than your deposits and is only suitable for experienced clients who have sufficient financial means to bear such risk. No information in this document is investment advice or a solicitation to buy or sell any financial instrument.

Futures

Choose the profile which fits you best

The Trader pricing is applied by default to new accounts for the first 4 calendar months.

After this period, the "Trader" pricing will be maintained quarter after quarter as long as you met minimum volume conditions during the previous quarter.

If not, your account will be switched to "Active" or "Standard" pricing and if you then meet minimum volume conditions during a full quarter, you can request via email to upgrade to get a better pricing.

Note that only orders placed via the ProRealTime platform are taken into account for minimum volume conditions.

Trader > 30 round trip trades (or 60 contracts) per month

Benefit from ultra competitive brokerage fees from Saxo Bank, with ProRealTime's platform and service in addition.

Platform fees & platform rebates

When you place orders with the ProRealTime platform, you get a platform rebate for each executed order or contract. The platform rebates are deducted from your monthly subscription to the ProRealTime platform.

1 st and 2 nd calendar months	ProRealTime platform FREE		
3 rd month and beyond	Platform fee 	Rebates from executed orders 	Get your platform for free or at a reduced price

Platform fee before rebates

PRODUCT	MONTHLY FEE
Platform license	29.96 € /mth excl.tax
Forex & spot metals	Free real-time access
Stocks / Futures / Options	Starting at 5 € /mth excl.tax
Delayed data	Free

Rebates from executed orders

TYPE OF INSTRUMENT	REBATE ON ENTRY	REBATE ON EXIT
Futures / Options	-1 € per contract	-1 € per contract
Forex / Metals	-1 € per order	-1 € per order
Stocks, ETFs	-1 € per order	-1 € per order

[See examples based on your trading activity](#)

Notes:

- The trading platform rebates from orders executed the previous month are deducted from the price of your trading platform for the following month and are only available with monthly recurring subscription plans.
- In a given month, if the amount of the rebate is greater than the cost of your next monthly trading platform subscription price, the balance is carried forward to the following months with a maximum possible credit of 200 € for Complete workstation subscribers, and 2,000 € for Premium workstation subscribers. After a period of 6 months without any executed order through the ProRealTime Trading platform, any potential credited amount is lost.
- The trading platform rebates and possible credited amounts can only be used in deduction of your ProRealTime software subscription.
- If your trading platform subscription payment is in USD, the rebates will be converted from EUR to USD at the rate on the day the rebate is used.
- Only the orders you place through the ProRealTime platform or ProRealTime mobile platform are eligible to give workstation rebates when executed.

Other fees

Currency conversion fees

Currency conversions are executed using the FX spot mid-price at the time of the conversion, plus/minus the fee indicated below.

Automatic currency conversions will occur when you trade an instrument in a currency that differs from your base currency (for example when: buying/selling stocks, closing a position with gains/losses, paying/receiving options premium, ...).

Note that if you regularly trade instruments in a currency that differs from your base currency, you can open a sub-account in that currency to trade those instruments. This way you can avoid paying conversion fees on these transactions.

	FEE
Currency conversion	0.5 % of converted amount

Forex and metals financing fees

Open positions held at the end of a trading day are rolled forward to the next available business day.

The rollover is made up of two components; the Tom/Next swap points (Forward Price) and the Financing of unrealised profit/loss (Financing Interest).

- Tom/Next swap points (Forward Price): The swap points used are calculated using market swap prices from Tier-1 banks, plus/minus a mark-up indicated below on the Tom/Next interest swap rates. The final rate is used to adjust the opening price of the position.
- Financing of unrealised profit/loss (Financing Interest): Any unrealised profit/loss on positions that are rolled from one day to the next are subject to an interest credit or debit. The rate is calculated based on the daily market overnight interest rates plus/minus a mark-up indicated below. The final rate is used to adjust the opening price of the position.

	FEE
Tom/Next Swap Points (Forward Price)	+/- 0.45 %
Tom/Next Swap Points (Forward Price) - Crypto FX	+/- 2.7 %
Financing of unrealised profit/loss	+/- 2.75 %
Financing of unrealised profit/loss - Crypto FX	+/- 2.75 %

Notes :

- The global market convention is that the value date rolls forward at 17.00 Eastern Standard Time, however there are exceptions to this rule e.g. NZD, which rolls forward at 07.00 New Zealand Daylight Time.
- An additional +/- 0.30% mark-up is applied to Mexican Peso (MXN), Turkish Lira (TRY) and South African Rand (ZAR) currency crosses.
- Historical swap points are available on the Saxo website here.

Credit and debit interests

Interest on your main account is calculated on the Net Free Equity.

Interest on sub-accounts is calculated on the Account Value.

Since the Net Free Equity is calculated on open trade positions on all your accounts, it is important to make sure that sufficient cash is available on your main account. Otherwise, you risk being subject to a debit interest on your main account.

Net Free Equity is:

- value dated cash balance of your main trading account
- Plus or minus any unrealised profits or losses from open CFDs, FX Forwards and Futures on your main trading account
- Plus the market value of any FX Options on your main trading account
- Minus any margin required for financing open positions on your main trading account and sub-accounts

Interest will be calculated daily and settled monthly - within seven business days after the end of each calendar month.

Credit interests for currencies with positive rates

For positive Net Free Equity, the interest will be the highest of either: the market bid rates minus the markdown or zero. Interest will be paid on the full amount, if Account Values/Net Free Equity is above threshold.

	STANDARD	ACTIVE	TRADER
Net Free Equity above USD (or equivalent)	50,000	0	0
Credit interests	Market rate -3%	Market rate -2%	Market rate -1%

Debit interests

The following Debit interests apply in case of negative Account Values/Net Free Equity.
The interest will be the highest of either: the market rates plus the markup below or the markup below.

	STANDARD	ACTIVE	TRADER
Debit interests for negative Account Values/Net Free Equity	Market rate +8%	Market rate +7%	Market rate +6%

Manual order fee

Clients placing orders over the phone, chat or email will be subject to a manual order fee of EUR 50 per order. Certain products that cannot be traded on the platform may be exempt.

Miscellaneous

- **Split Orders:** In case an order regarding a security is split, and filled partially over a period of more than one day, the total trading costs may increase. The reason for such increase is that the minimum fee may be charged more than one time based on the number of days necessary for the total execution of the order.
- **Physical delivery Futures:** Taking or making physical delivery in an underlying asset is not offered. If futures positions are not closed before the relevant date (day before the "first notice date" or expiry date), Saxo will close the position on your behalf at the first available opportunity at the prevailing market rate, which will incur additional charges.
- **Reporting fee:** a fee of USD 50 – or the equivalent amount in the account currency – will be charged when client requests online reports to be delivered by email. This fee will also apply for third-party requests for reports from, for example, auditors.
- **Proxy voting service fee:** A proxy voting service fee of 30 EUR (excl. VAT) per quarter will be charged to clients who subscribe to Saxo Bank's meeting services. In addition, a 5 EUR (excl. VAT) per vote fee will be levied for every vote or change to a vote.
- **1042-s form:** you can request forms 1042-S, however a 1 000 EUR handling fee per income may apply. Contact Saxo to learn more.

Custody & carrying fees

For accounts with stock or ETFs/ETCs positions the custody fees below apply. The custody fee will be calculated daily using the end of day values and charged on a monthly basis. Regional differences may apply.

Positions held overnight in Listed Futures, CFD Futures, and short Listed Options will be subject to a carrying cost. The carrying cost is calculated on the basis of the daily margin requirement and applied when a position is held overnight. It is charged at the end of each month.

The carrying cost is based on the relevant Interbank-rate (floored at 0%) plus the rate (in percentage) from the table below:

Carrying Cost = Margin requirement x Days held x (Interbank rate + rate below) / (360 days)

	STANDARD	ACTIVE	TRADER
Stocks and ETFs/ETCs	0.12 % per year min. 5€/month	Free	Free
Futures	3.5 % of margin requirement per year	1.5 % of margin requirement per year	0.5 % of margin requirement per year
Short listed Options	3.5 % of margin requirement per year	1.5 % of margin requirement per year	0.5 % of margin requirement per year

Please note VAT applies in addition to the custody fee.

Individual clients:

- residing within the EU, Danish VAT 25 % will apply
- residing outside of the EU, no VAT will be applied by Saxo Bank A/S

Corporate/Institutional clients:

- having its place of business in Denmark, Danish VAT 25 % will apply
- having its place of business within the EU (except for Denmark), no VAT will be applied by Saxo Bank A/S if a valid EU VAT ID is provided.* A reverse charge invoice will be provided.
- having its place of business within the EU (except for Denmark), Danish VAT 25 % will be applied if a valid EU VAT ID is not provided.
- having its place of business outside the EU, no VAT will be applied by Saxo Bank A/S, but local VAT rules may apply

* Only a EU VAT ID that is verifiable through [the EU commission's website](#) will be registered as a valid EU VAT ID. If the EU VAT ID is not verifiable, please contact your local VAT authority.

Italian Financial Transaction Tax for derivatives

The tax applies on Buys and Sells of all Italian Derivatives whose underlying assets are equity instruments issued by Italian companies, regardless of the client's country of residence.

Other financial instruments

The financial instruments below are only available from the Desktop and Mobile platforms offered by the broker. The orders and positions on these instruments will be visible only in these platforms and not in ProRealTime.

The real-time access of your ProRealTime platform and the platforms offered by the broker are independant. The real-time access for the broker's platforms can be managed from the broker's account management interface and are paid directly to the broker.

Only orders placed on the ProRealTime platforms are taken into account for the volume conditions of the Active or Trader pricing and for platform credits.

Notes:

(1) Stocks, ETFs

Financial transaction taxes:

- Taxation on French Stocks: For French large cap stocks a Financial Transaction Tax (FTT) of 0.30% applies to all buy trades. The full list of stocks can be found in [the official application decree \(in French\)](#) .
- Taxation on Italian Stocks : From 1 March 2013 the Italian Financial Transaction Tax (FTT) of 0.10% will go live on all purchases of Italian shares and Equity linked securities (i.e. depositary receipts) in listed companies that have a registered office in Italy. Please find [here the Ministerial Decree as issued by the Italian Minister of Economy and Finance](#).
- Taxation on Spanish Stocks: From 16 January 2021 the Spanish Financial Transaction Tax (FTT) of 0.20% will be applied to all purchases of Spanish shares and equity-linked securities (i.e. depositary receipts) in listed companies with a capitalisation above EUR 1 billion.
- Taxation on UK Stocks : For UK stocks a Panel for Takeovers and Mergers (PTM) Levy and Stamp Duty may be applicable. Stamp Duty is applied on all buy transactions at a rate of 0.5% of the transaction value. A PTM Levy of GBP 1 is applied to buy and sell transactions where the Gross Value of the trade exceeds GBP 10,000. Please note that for Irish registered stocks, Stamp Duty is 1% of the transaction value.
- Taxation on Irish Stocks: Stocks have an ITP (Irish Takeover Panel) levy charge of 1.25 Euros for stock purchases and sales, where the trade value exceeds 12,500 Euros. Ireland Stamp Duty 1.0% of Transaction Value for stock purchases on.

All the fees indicated on this page are paid directly to the broker from your trading account and include ProRealTime's commission. ProRealTime's commission are displayed in the reporting section of your Saxo account under 'Partner Commissions'. The fees are the same for orders transmitted via ProRealTime's platform or via Saxo's platforms. For more information, contact us.
